Resume

Frontend Developer with +3 years of experience in building modern, responsive web interfaces, applying best practices in performance, accessibility, and user experience. Specialized in **Vue.js, Nuxt.js, React.js, and Next.js**, with a focus on scalable solutions built under **SOLID principles, Clean Architecture**, and **SaaS models**. Known for strong technical leadership, collaborative teamwork, and continuous learning, I bring a disciplined, structured approach focused on quality and delivery excellence.

Experience

guane Emerging Technologies Frontend Developer	Remote Mayo 2023 - November 2025
Throughout my career at guane, I was responsible for modernizing and adapting existing projects with a strong focus on mobile-first, responsive and adaptive development . This work included reviewing and aligning technical standards using tools like Google Lighthouse , achieving accessibility and performance scores above 80% and measurable reductions in page load times. I was a key member of the team maintaining a logistics SaaS application actively used by thousands of users across the USA and Canada , ensuring consistent, high-performance experiences across multiple concurrent clients. I contributed to client-facing frontend services under the SaaS model , applying SOLID principles and Clean Architecture as foundational pillars to build decoupled, predictable, and easily testable interfaces that effectively adapt to business changes. I actively participated in sprint planning ceremonies , collaborating with cross-functional teams to define scope, estimate effort, and align technical decisions with business goals.
