Resume

Frontend Developer with 3 years of experience in building modern, responsive web interfaces, applying best practices in performance, accessibility, and user experience. Specialized in **Vue.js, React.js, Nuxt.js, and Next.js**, with a focus on scalable solutions built under **SOLID principles, Clean Architecture, and SaaS models**. Known for strong technical leadership, collaborative teamwork, and continuous learning, I bring a disciplined, structured approach focused on quality and delivery excellence.

Experience

guane Emerging Technologies Mayo 2023 - November 2025
Frontend Developer Remote

Throughout my career, I was responsible for modernizing and adapting existing projects, focusing on performance optimization for mobile devices through the application of **responsive** and **adaptive** development techniques. This work also involved reviewing and aligning technical standards based on recommendations from tools like **Google Lighthouse**, ensuring **accessible, fast, and industry-compliant products**. Additionally, I contributed to the development of client-facing frontend services under the **SaaS model**, delivering **consistent, maintainable, and high-performance user experiences**. In every project, I have applied **SOLID principles** and **Clean Architecture** as foundational pillars to build **decoupled, predictable, and easily testable interfaces** that effectively adapt to business changes and support cross-functional team collaboration.
